

LET'S GO **ECO**

SAVEGLOBE'S

Cut Clay

2

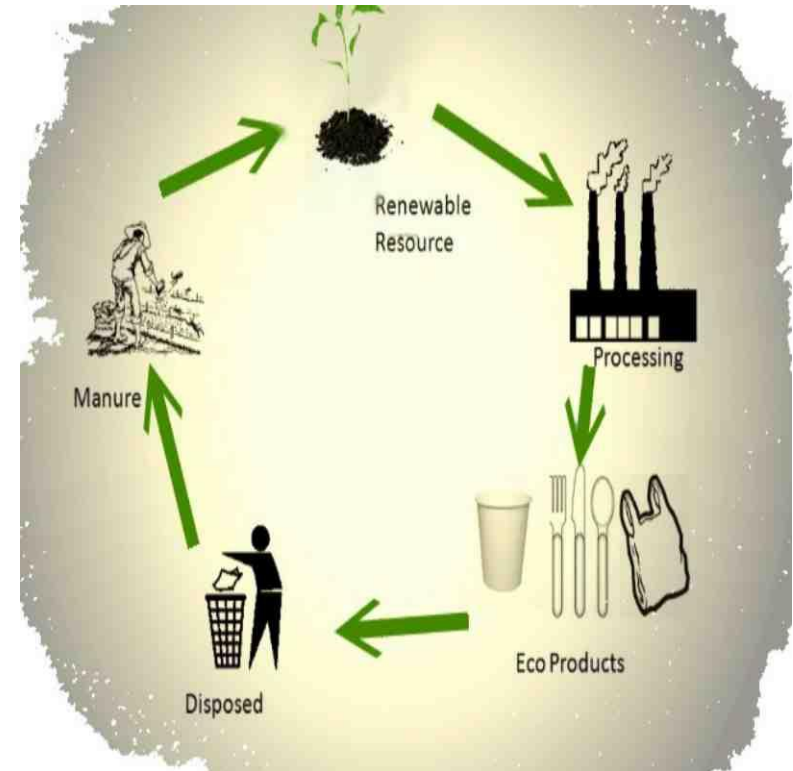

We firmly believes that we the people had survived thousands of years without plastic before the plastic originated and we know how to survive without it. We just need to focus on the harmful consequences of using plastic. With the growing awareness and greater marketing strategies, these ecofriendly products which are better for our earth's health will touch the peak one day.

SAVEGLOBE aims to provide alternate solutions to the plastic which convince the people by its usability and buying experience and not just by "No Plastic" products. Because if the buyer do not induce with the product that they are buying is fit for their use then it is easy for them to switch back to plastic which is at low cost and widely available.

The products that are produced by SaveGlobe are not regularly available in the market, as SAVEGLOBE products are not only environment friendly and sustainable, it also has wide range of collection in its "Lets Go Eco" theme that matches in the present day needs. People choose SAVEGLOBE for its unique style in blending the green concept into its cutting-edge trend which grabs the corporate world on its exclusivity.

The major source of the raw materials that are used in the SaveGlobe products are renewable and abundance in availability that has negligible carbon foot print which are naturally biodegradable. Hence the products produced by SaveGlobe comes from nature and goes back to nature without costing our World. Last but not the least SaveGlobe products has no plastic in it.

Major Chunk of SaveGlobe revenue comes from Corporate Sales, Retail, Online, exports and Corporate Gifting.

Customization is the Core Strength of SaveGlobe with Commitment to quality.

Our Products are Uniquely developed with greater efficiency and a finer finish.

Case Study:

Tata Q – Customized Eco Friendly Serviette
